Ahmedabad, Gujarat, India

Technical Skills

Languages JavaScript (Node.js), Python, PHP, SQL, Bash
Backend REST APIs, API Integration, Backend Services
Frameworks Express.js, Flask, Django
Databases MySQL, PostgreSQL
Cloud & Infra AWS EC2, Linux, Docker
Tools Git, GitHub, Postman

Professional Experience

Backend Software Engineer — Asambhav

Sep 2025 – Present

Ahmedabad, Gujarat

- Built JavaScript API wrapper services integrating Google Gemini and Oracle Hospitality (OHIP) REST APIs.
- Developed WhatsApp chatbot backend supporting hotel booking check-in and check-out workflows.
- Engineered a prompt-to-PDF service that converts AI responses into structured documents.
- Integrated hospitality APIs to process real-time hotel inventory and reservation data.
- Collaborated with frontend teams to connect React applications with backend services.

Backend Developer — FlyAnyTrip.com

Dec 2024 – Aug 2025

Vadodara, Gujarat

- Developed backend services for real-time train tracking using railway APIs.
- Built REST APIs using Python frameworks for travel-related services.
- Deployed backend applications on AWS EC2 and managed Linux server environments.
- Implemented API integrations to process transport schedule and status data.

Software Engineering Intern — byteXL

May 2024 – Jun 2024

Parul University, Vadodara

- Developed Python automation scripts and data processing tools.
- Built web scraping utilities to extract structured data from websites.
- Created backend API endpoints integrated with application workflows.
- Worked with Git version control and collaborative development practices.
